

# Learning from the Future: Normative and Performative Scenario Modeling

Dr. Henning Breuer,  
Jörn Schulz, Julia Leihener

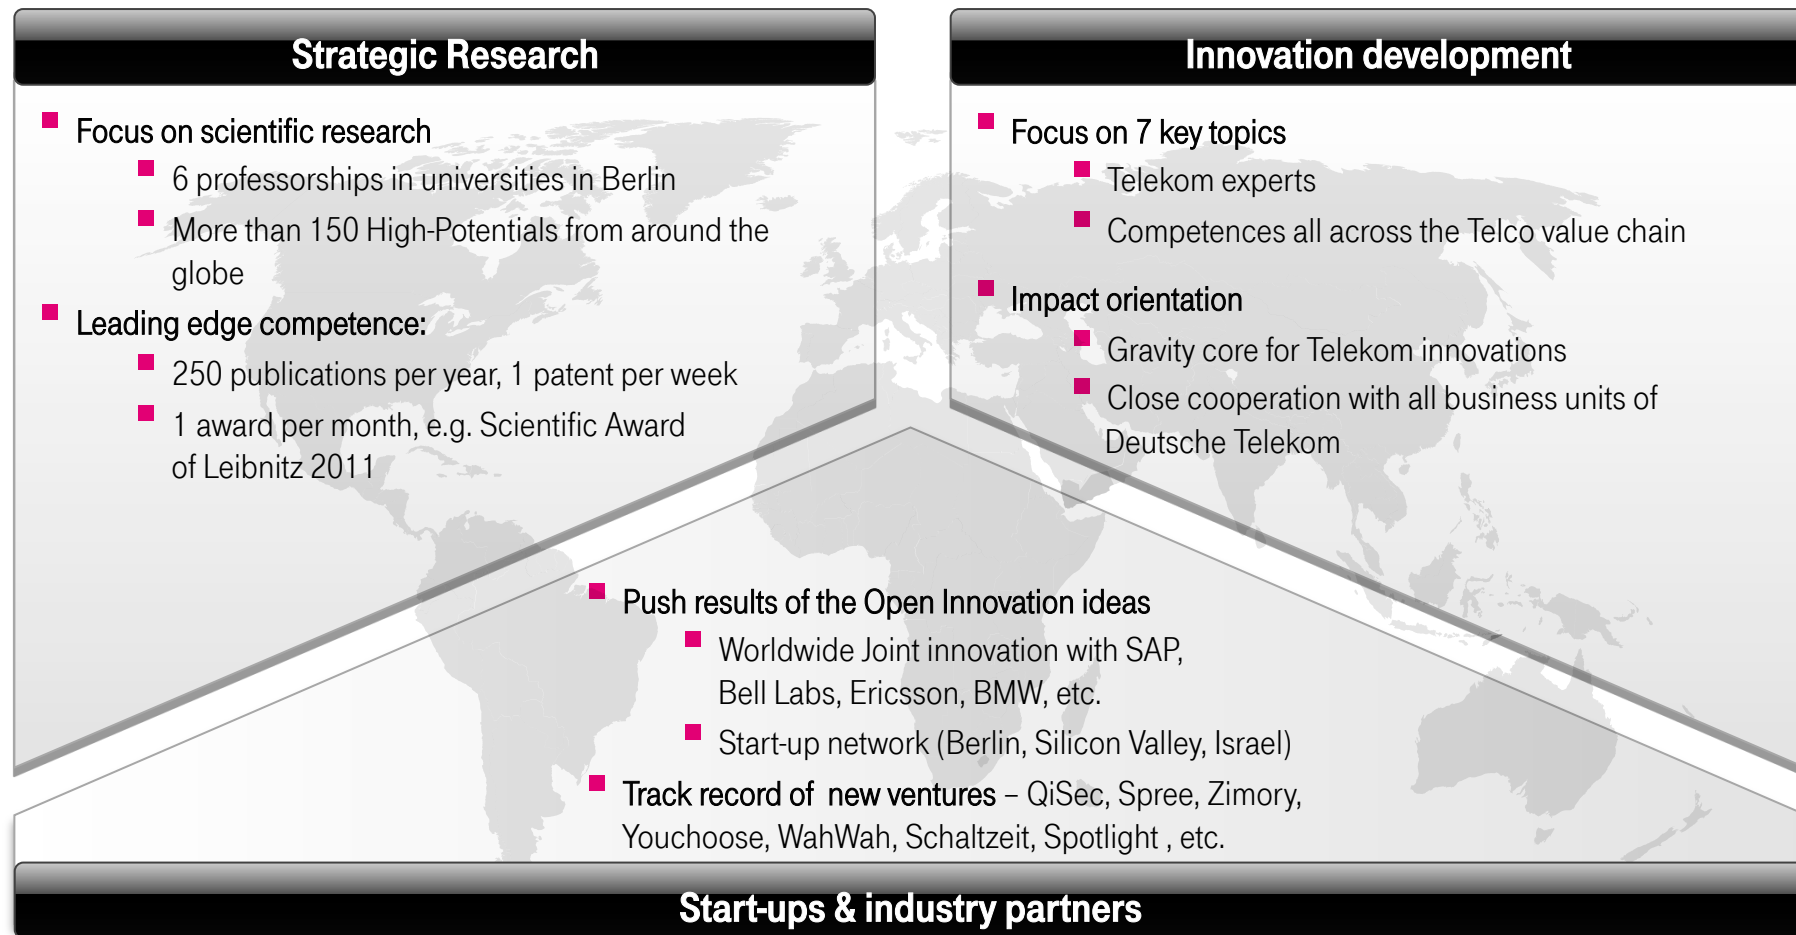

Presented in June 2012 at XXIII ISPIM Conference Barcelona. International Society of Professional Innovation Management. Spain.

Telekom **Innovation** Laboratories

# Telekom Innovation Laboratories combines the best of three worlds.

Network of international partnerships with prestigious research institutes, universities, industrial partners and start-ups.

Telekom **Innovation** Laboratories

In a previous project we followed a classical approach ...

### Trend Analysis

- Internal Sources
- External sources
- Knowledge of the participants

### Scenario development

- System analysis & selection of key factors
- Alternative future projections
- Clustering of projections
- Enrichment of scenarios and their interaction

.....T.....

A new approach was developed to explore access in 2020.

1

Normativity, performativity & transparency in scenario modeling

2

Empirically grounded scenarios

3

A case on convergent communication 2020

4

Scenario communication and conclusions

# The qualitative approach applies three principles ...

**Normativity:** From trend extrapolation to environmental exploration and visions.

**Performativity:** From an image to an one time learning exercise and a practice.

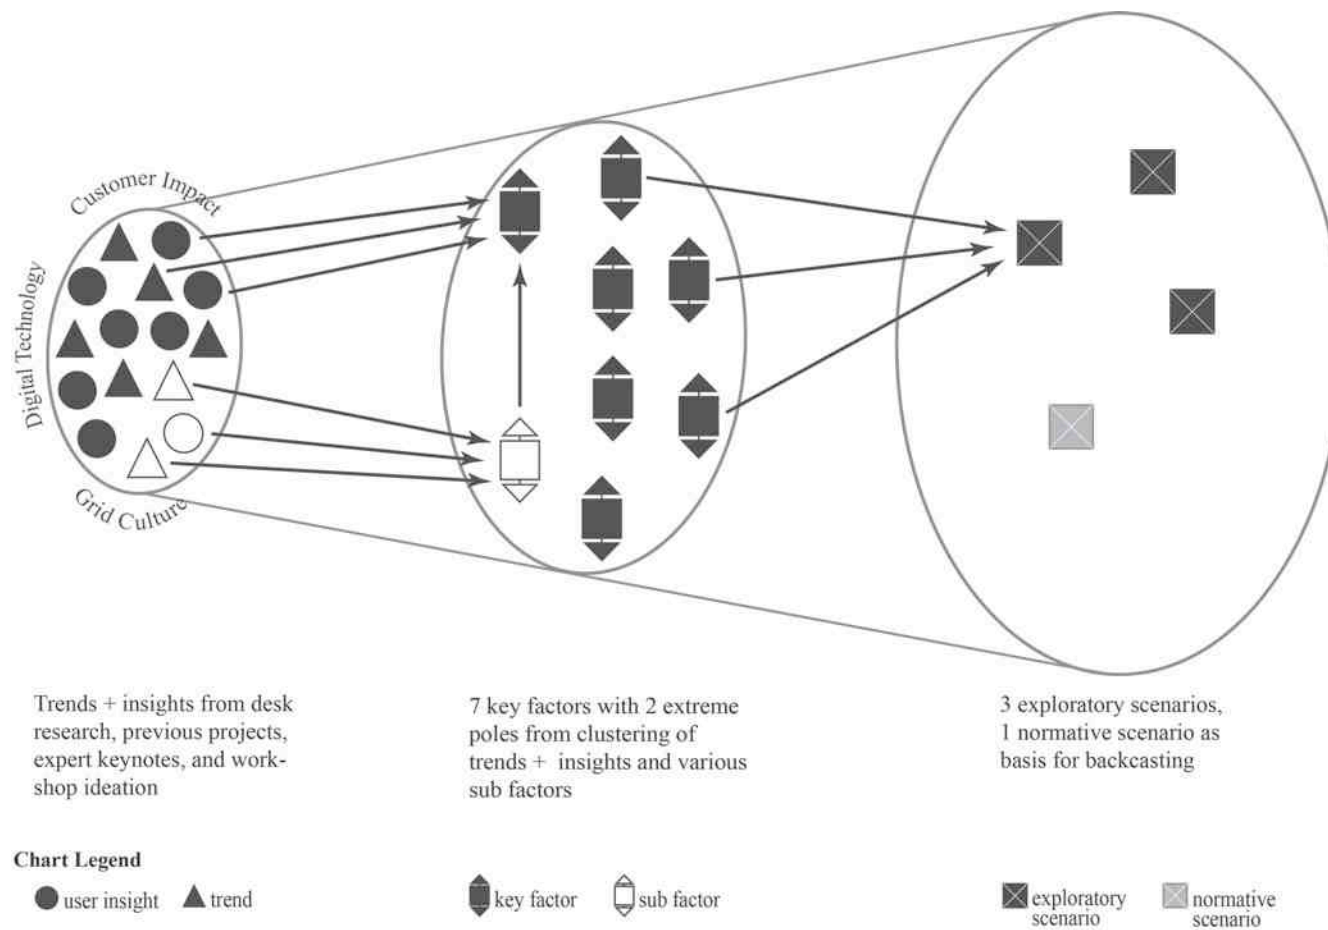

**Transparency** in every part of the discourse, multimodal communication.

A qualitative modeling approach:

- deep involvement of participants in a
- transparent process addressing
- exploratory as well as normative visions.

... in order to develop empirically grounded scenarios.

Critique, utopia & realisation proceed beyond exploration.

Kuhnt, B., N.R. Müllert; Moderationsfibel Zukunftswerkstätten: Verstehen, Anleiten, Einsetzen. Ag Spak Verlag: Neu-Ulm, 1997.

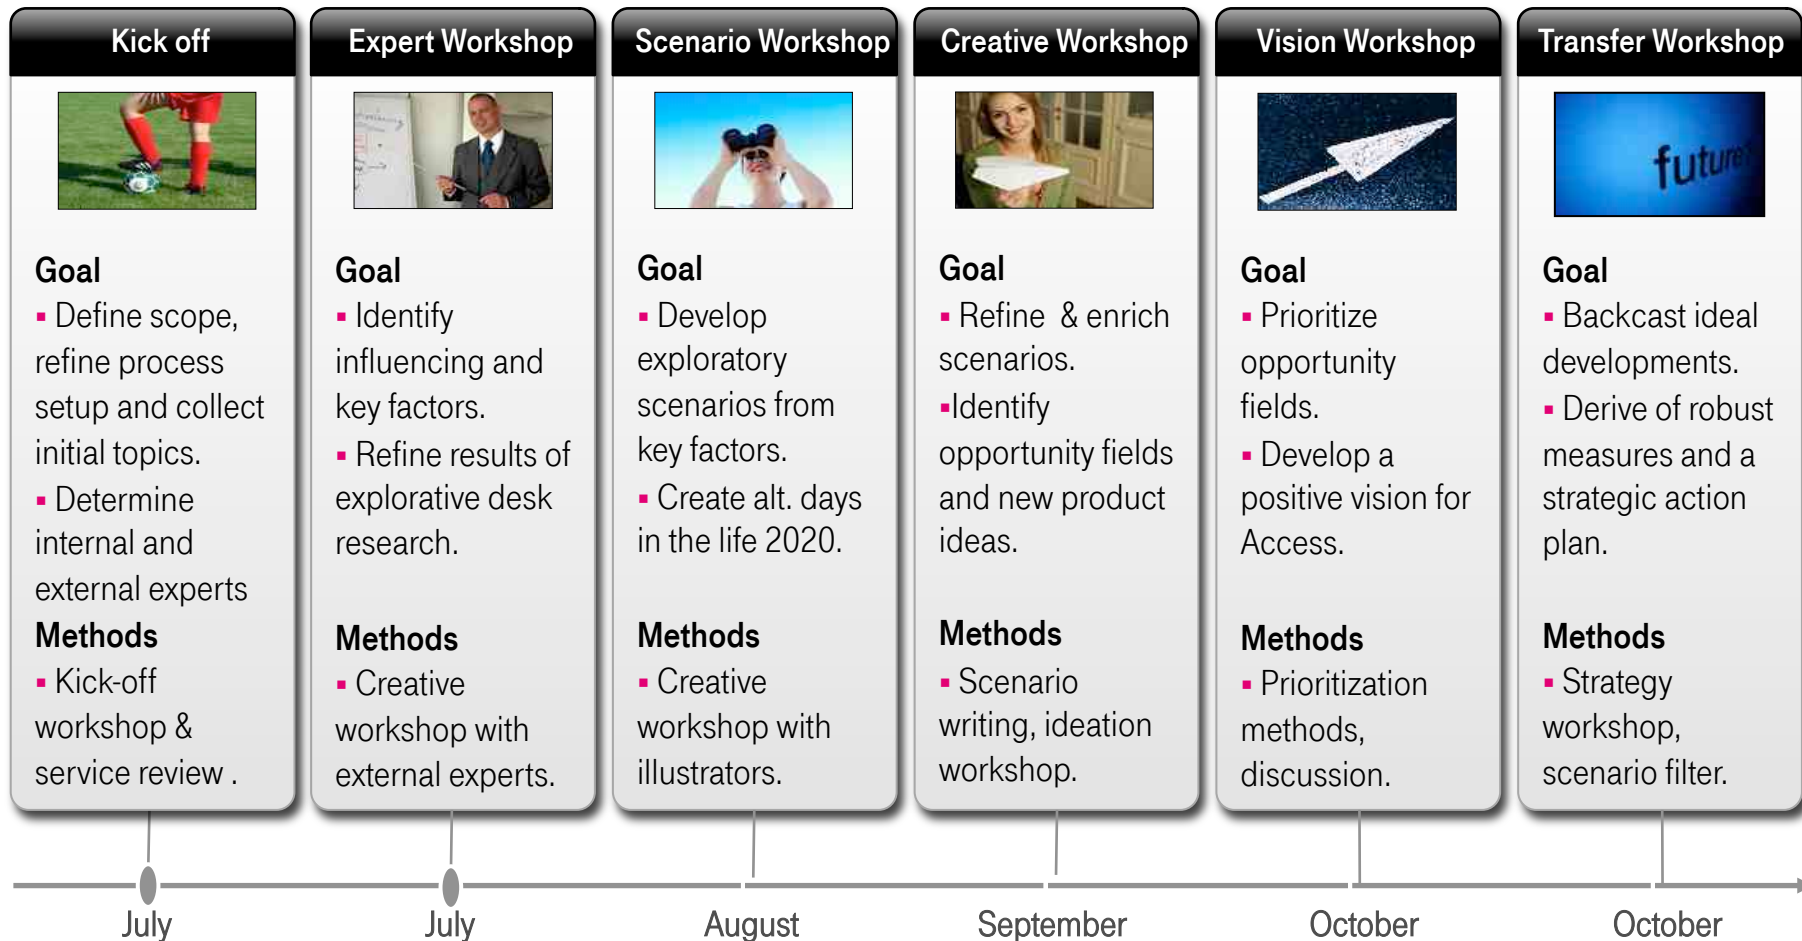

Exploratory and normative scenarios inform strategic decisions.

The process was organized through six workshops.

After language and scope had been clarified influencing factors ...

... and core factors have been discussed and prioritized.

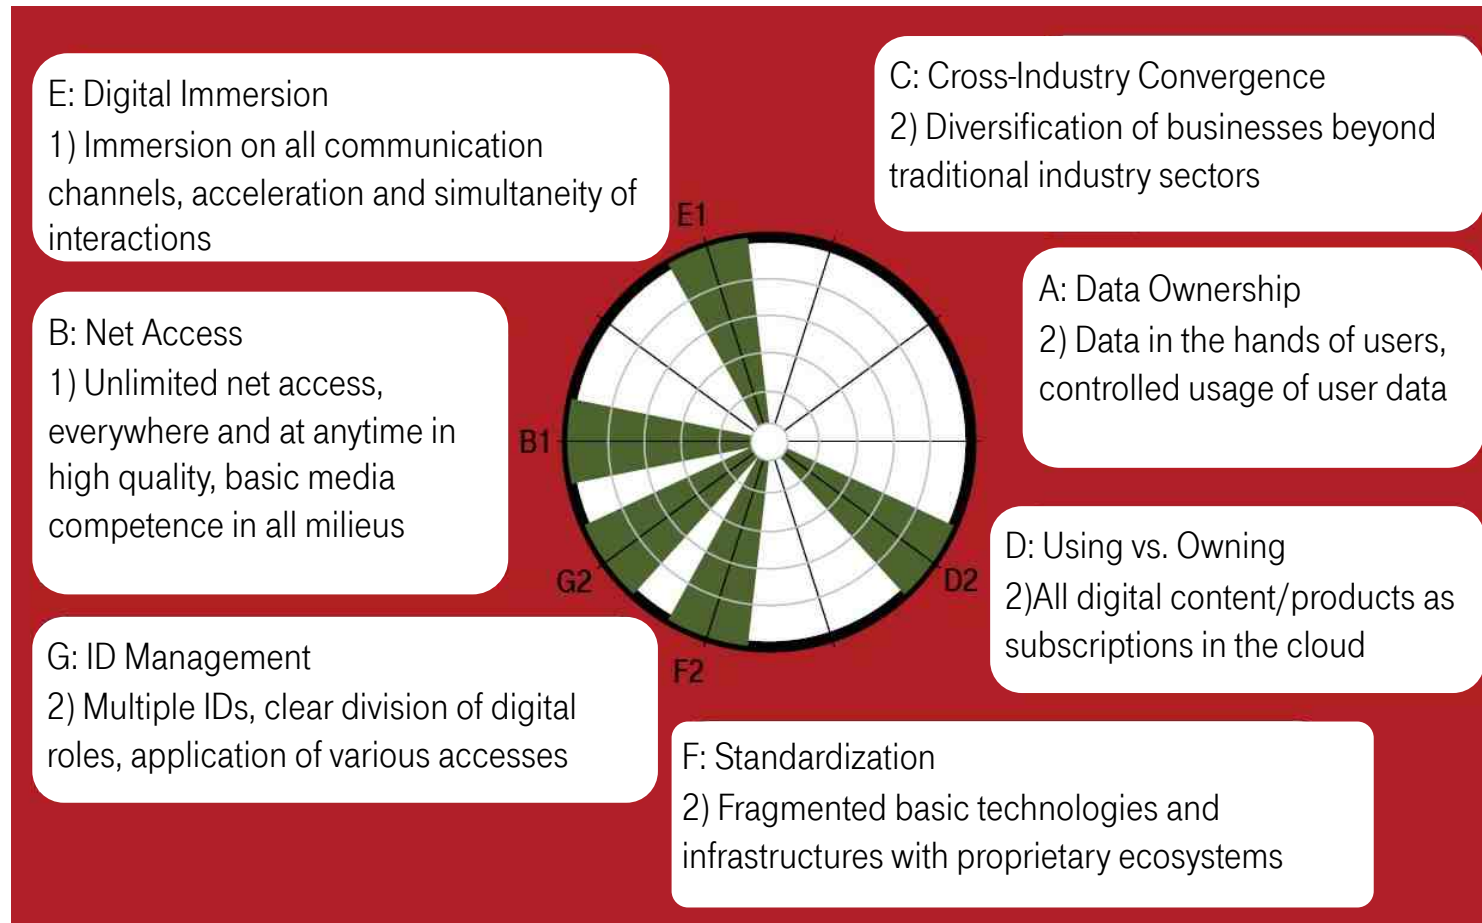

Core Factor: One Identity Management.

Each exploratory scenario results from the same factors.

### Exploratory scenario “Brave New World”

Five key factors have been identified ...

... and explored.

## Endlich!

Unternehmen einigen sich auf Standard für 3D Holografie.

## 15-facher Vater mit Multiple ID wird von 5 Müttern überführt.

Von Jörg Kleinert

**HORNBURG.** Vorhang auf zur 27. Spielsaison: Das Altstadttheater Hornburg feierte am Freitagabend die Premiere des Stücks „Zickenalarm“ von Jürgen Baumgarten – eine spritzige, herrlich groteske Komödie, die voller Schalk und Humor steckt.

Die Aufführungen des Ensembles sind inzwischen Selbstläufer. Die Premiere auf den „Brettern“ im Haus Hagenberg war wie gewohnt ausverkauft. Hinter den Laiendarstellern lagen intensive Probenwochen. „Die Stadt Hornburg ist stolz auf ihr Altstadttheater“, betonte Bürgermeisterin Helga Küchler.

Zum Inhalt: Stefan Sander (Felix Namuth) will sich was Gutes gönnen, nämlich Urlaub auf den Baha-

mas. Sonne, Meer und schöne Mädchen – herrliche Aussichten. Er will Nicole (Britta Meyerhoff), seine Verflissene, vergessen. Doch vorher muss ein „Wohnungs-Sitter“ her.

Die Warnungen seiner Nachbarin Lisa Bader (Sylvia Baue), eine passionierte Pessimistin, schlägt Stefan in den Wind. Kaum hat er eine Anzeige geschaltet, wird sein Appartement von der Weiblichkeit gestürmt. Fünf Frauen auf der Flucht vor ihren „Verflissenen“ und auf der Suche nach einer preiswerten Bleibe. Und dann interessiert sich noch ein Mann für Stefans Wohnung – der ökologische Dauercamper Martin (Michael Lindauer).

Bei fünf Frauen sind aber mindestens vier zu viel an Bord, stellen die Ladies bald fest. Sie liefern sich einen Zickenkrieg vom Feinsten, um

Die Telekom hat es geschafft – 95% der Deutschen nennen den Netzzugang als höchstes Gut.

Studie ermittelt: Netzzugang ist menschliches Grundbedürfnis Nr. 1 – vor Familie und Freunden (60%). Digitaler Sex überholt den Analogen – Liebe ist...? Klassische Grundbedürfnisse werden vom Netz optimal gesteuert – daher sekundär!

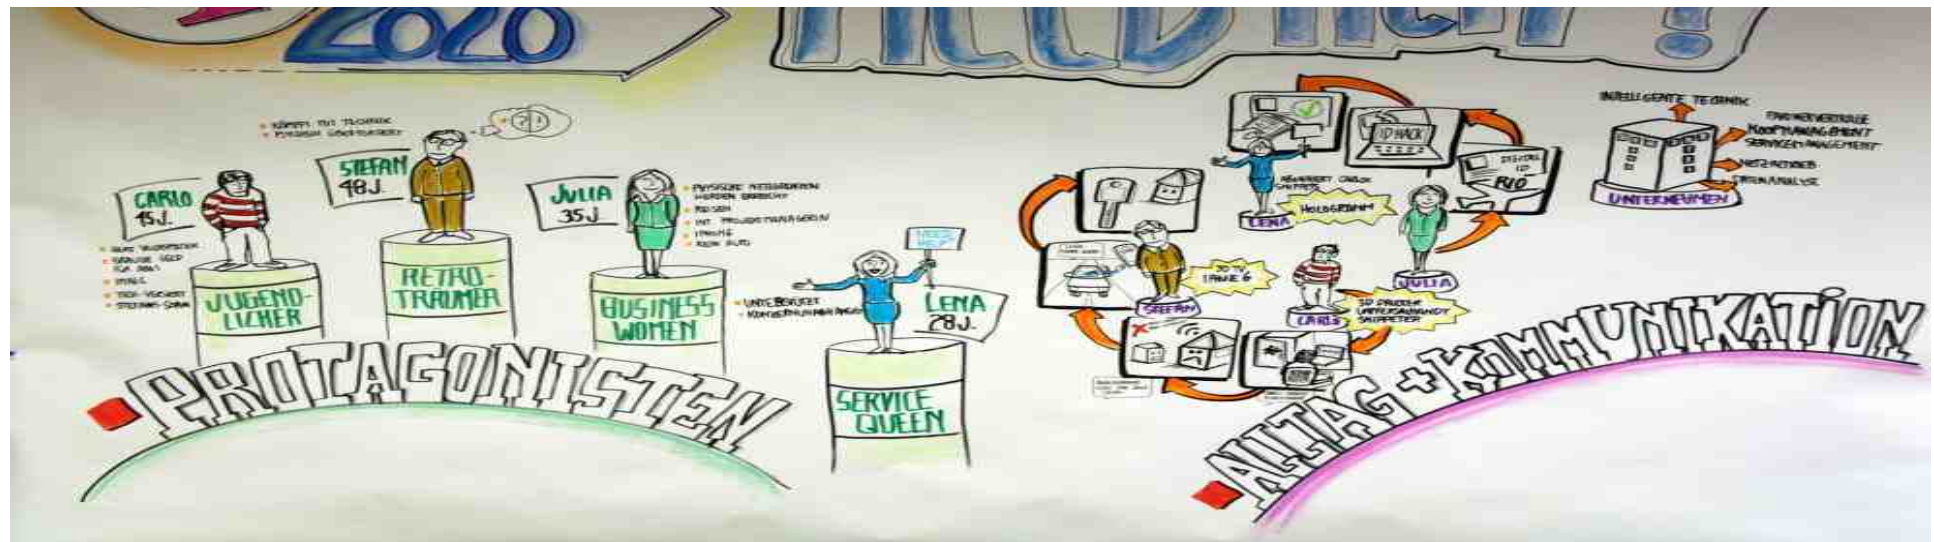

### Maslow 2020

Sex  
Soziale Anerkennung

Netzzugang

Live illustration supports live discussions.

## Realistic narrative reveals new details on a “Brave New World”.

[...] In order to get to his school today, Kevin rents a skateboard from the central parking house in his neighborhood. Big letters on the skateboard identify it as "Spaceboard" since it is being provided by the social network Spacebook. The costs for renting the skateboard is covered by the membership fee for Spacebook. [...] Kevin simply scans the QR code on the skateboard to check it out and to use it for the rest of the day. For the teenager Kevin, these sharing models are really handy since he doesn't need to own all these things but can use them.

The backbone of this paradigm shift in consumption is telecommunication. All things are connected to each other in the Internet of things. [...]

A future gallery visit triggered ideation and controversial discussion.

A stop motion movie promotes follow up activities.

For each of the scenarios the strategy matrix depicts activities ...

**T-Access 2020:** Unlimited Internet Accessibility, High Standardization, Usage on Demand, Intense Digital Immersion, One-ID Management

*Activities* →

**Scenario 1:** Networked automation is seamlessly omnipresent and helpful

*Activities & Opportunities* →

**Scenario 2:** Problems from missing standards and digital immersion find innovative solutions.

*Activities & Opportunities* →

**Scenario 3:** Access barriers and people struggling with side effects of global transformation.

*Activities & Opportunities* →

2012

2016

2020 →

... and new opportunities particularly for the alternatives.

**Challenge:** Problems from missing standards in the scenario “Brave New Digi World”.

**Challenge:** Access barriers and people struggling with side effects of global transformation.

### Central Transcoding

**Why?** Services are not supported across all networks, e.g. HD Voice due to codec diversification within different networks.

**How?** DTAG offers central transcoding for services providing bridges between ecosystems.

### Fall-back Net

**Why?** Net access is not always secure and reliable, but business and customers need security & net access anytime.

**How?** DTAG offers alternative ways of accessing the net, e.g. via a satellite router.

An interactive learning architecture was set up ...

... to host team discussions and management events.

# Modeling future scenarios is an ongoing learning exercise ...

... that profits from normativity, performativity & transparency.

**Normativity:** The normative vision proved to be a most valuable result, with exploratory scenarios for plan B.

**Performativity:** From a learning exercise towards a practice.

**Transparency :** Empirically grounded in needs and expert perspectives, combined with service design methodology.

Future research:

- Set up and evaluate educational curricula, methods and media for modeling scenarios as **learning** experiences.
- Broadcast practices & mindfulness for innovation to sensitize for alternative futures & opportunities & strengthen strategic vision.

Thank you!
